F. F. Finch Failed to Appear Be fore the Grand Jury When

Years ago when it first came out the writer used to think that the mission style was about the ugliest thing he'd ever seen, but ingenious and artful American manufacturers and designers have hammered at mission so long that now even our cheapest pieces are artistic and tasteful. And one thing particularly about mission furniture is that you do NOT have to have an entire room furnished in it. For instance, take families that have been housekeeping for ten to thirty or more years-they have an accumulation of walnut, different shades oak, and mahogany furniture, all more or less showing wear, which would look ready for the auction house were you to put, say, a new bookcase or more likely rocking chair with a highly-polished finish, in oak or mahogany. But Jurgens' mission furniture is unobtrusive and, instead of a ing the old furniture look bad. would, from the very nature of its design and finish, improve the looks of things in the way of elegance, ease and home-likeness. Why, even a great many new housekeepers mix in a few pieces of Jurgens' Mission furniture to Line to Be Built Through Stafford keep from having things look too

> We show an elegant assortment of mission furniture.
